Allowable Subject Matter

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Simon on Thursday June 30, 2005.

The application has been amended as follows:

Please replace the Abstract with the following

ABSTRACT

Planarizing machines for chemical-mechanical planarization of microelectronic substrate assemblies are disclosed. The planarizing machines for processing microelectronic substrate assemblies generally include a table, a pad support assembly either positioned on or in the table, and a planarizing medium coupled to the pad support assembly. The pad support assembly includes a fluid container and an elastic membrane coupled to the fluid container. The fluid container generally is a basin that is either a separate component that is attached to the table, or a depression in the table itself. The fluid container can also be a bladder attached to the table. The fluid chamber is filled with support fluid to support the elastic membrane over the fluid chamber.

2. The following is an examiner's statement of reasons for allowance: a bladder having as recited in the independent claims including the limitation of the bottom section and the sidewall having thicknesses greater than the thickness of the elastic membrane (defining the top portion) defining a semi-rigid support, places the application in condition for allowance.
